This is a profile of Harmans Water Ward. It is intended to accompany the wider Joint Strategic Needs Assessment of Bracknell Forest. Profiles have been created for each of the Electoral Wards within Bracknell Forest.

The profiles are split into nine topics with these being accompanied by a summary of key findings and supported by metadata (information about the data used within the profiles).

The profiles are a tool which will be regularly developed with both improved functionality and also new and refreshed indicator data. We welcome your comments and suggestions so that we can ensure future developments are relevant and useful to you.

The profiles are in the main based only on data that are collected nationally with a high degree of completeness. This has been supplemented with local data where this has been considered appropriate.

Some indicators may give small numbers at Ward level. This should be taken into consideration when interpreting the data. Small changes in counts can lead to wide variance in the rate, and counts can vary significantly from year to year.

Any provisional conclusions drawn from the profiles should be compared with other sources of information, both quantitative and qualitative.

1. SUMMARY

There are 8,537 people living in Harmans Water, 9.7% of these are children aged 0 to 15 and 6.1% are older people aged 65 and over. The non-white British population accounts for 16.3% of the total population. 86% of the Harmans Water population were born in the UK. This is fewer than the average of Bracknell Forest.

Harmans Water is the 5th most deprived ward in Bracknell Forest (out of 18 Wards). 15.7% of children in Harmans Water are at risk of living in poverty, compared with 10.2% across Bracknell Forest.

In Harmans Water 10.1% of the working age population claim benefits compared with 7.4% in Bracknell Forest. 71.75% of the population of Harmans Water who are aged 16 to 74 years are in employment. This is lower than the average in Bracknell Forest. In Harmans Water, the majority of people in employment (44% of workers) were employed in Managerial/professional/technical occupations. 18% of workers were employed in Professional occupations. 16.5% of working age people in Harmans Water have no formal qualifications.

60.2% of children living in Bracknell Forest achieved 5 GCSEs at grade A* to C. 57.4% of children living in Harmans Water achieved 5 GCSEs at grade A* to C. 65.4% of children living in Bracknell Forest achieved the expected level of attainment at Key Stage 2. 67.2% of children living in Harmans Water achieved the expected level of attainment at Key Stage 2.

The average life expectancy at birth for males living in Harmans Water is 79.6 years. The average life expectancy at birth for females in Harmans Water is 84.3 years. Death rates from all causes in people aged less than 75 are As expected. Emergency hospital admissions for all causes are Lower than expected*.

An estimated 24.1% of adults in Harmans Water are obese. An estimated 18.6% of adults in Harmans Water binge drink. An estimated 26.5% of adults in Harmans Water eat healthily.

There are a total of 3484 dwellings in Harmans Water. The most common housing type in Harmans Water is Terraced. This accounts for 33.3% of all housing. The average household size in Harmans Water is 2.3 people and 4% of housing in Harmans Water is classified as needing one or more bedrooms more than it has in order to be adequately sized for the number of people living there.

There were 307 crimes recorded in Harmans Water during 2013/14. This equates to 36 crimes per 1,000 people living in Harmans Water - a rate that is lower than the average across Bracknell Forest.

In Harmans Water 100% of the population live in areas classified as urban city and town.

** Given the age and gender structure of the population and national death/admission rates*

1. SUMMARY

Category	Indicator	Harmans Water	Bracknell Forest Average	Ward Range Worst	Local Authority Average		Ward Range Best
					Worst	Best	
Deprivation & access	Indices of Multiple Deprivation - IMD (2010)	13.1	9.6	17.6			3.0
	% children in Poverty (2012)	15.7	10.2	19.9			3.3

	Post-16 Qualifications - % Level 3 or higher (2011)	41.1	42.7	32.1			55.6
Education	% key Stage 2 Level 4+ (2012)	67.2	80.2	67.2			96.0
	% 5+ GCSEs A*-C (inc Maths and English) (2012)	57.4	60.2	35.1			90.0
Health	All Cause Mortality <75 (2008-10)	96.7	87.4	118			62
	Life Expectancy - males (2008-10)	78.0	80	75.5			84.5
	Life Expectancy - females (2008-10)	84.1	84.5	80.7			88.9
	Emergency hospital admissions for all causes (2010/11)	81.0	75.5	88.2			55.0
	% low Birthweights <2500g (2008-10)	8.1	6.5	8.1			3.0
Housing	% occupancy rating - bedrooms -1 or less (2011)	4.0	3.0	5.7			0.9
	% no Central Heating (2011)	1.4	1.2	2.2			0.3
	% socially Rented (2011)	25.8	16.2	34.0			3.3
Community Safety	Crime rate per 1,000 (2013/14)	36.0	37.1	153.7			11.5
	Anti-social Behaviour rate per 1,000 (2013/14)	15.7	10.3	29.9			2.3
	Theft and handling stolen goods rate per 1,000 (2013/14)	11.5	13.2	76.8			1.7
	Violence with/without injury rate per 1,000 (2013/14)	6.9	6.6	22.7			1.5

How to read the spine chart:

The shapes on the graph represent the value of the ward compared against the Local Authority average. If positioned to the right of the average line this suggests the ward is performing 'better' in a particular indicator, to the left suggests it is 'worse'. This does not necessarily mean higher or lower values, e.g. high GCSE attainment is 'better', whereas a high crime rate is 'worse'. The light grey rectangle represents the range between the 'best' and 'worst' wards in the local authority. The yellow circles represent values that are within the 75th and 25th percentile for that indicator, or where most values typically lie. The black triangles represent values that are better than the average, whilst the blue diamond shows values that are worse.

2. DEMOGRAPHICS

- Harmans Water has a population of 8,537. This figure has increased at a greater rate than it has on average across Bracknell Forest since 2001.
- The working age population is relatively large in comparison to Bracknell Forest.
- Related to this, the ward has a proportionately larger young population (10%) and a smaller older population (6%).
- The 2011 Census indicates that 16% of Harmans Water are BME, higher than the Bracknell Forest average.
- The largest single BME population is the White: Other White group. This group represents 29.9% of BME people and 5.2% of the total population of the ward.

3. DEPRIVATION, POVERTY AND ACCESS TO SERVICES

Indices of Multiple Deprivation (IMD)

- Harmans Water is the 5th most deprived ward in Bracknell Forest (out of 18 Wards).
- There are no people in the ward who are living in areas classed amongst the 5% most deprived in Berkshire, according to the latest Indices of Deprivation.
- There are no people in the ward who are living in areas classed amongst the 5% most deprived in Bracknell Forest, according to the latest Indices of Deprivation.

Child Poverty

- 15.7% of children in Harmans Water are at risk of living in poverty, compared with 10.2% across Bracknell Forest.
- This figure has risen by 0.8% since 2006.

Free school meals

- 7.9% of children living in Bracknell Forest and attending schools in Bracknell Forest are eligible for and receiving free school meals. 11.1% of children living in Harmans Water are eligible for and receiving free school meals.

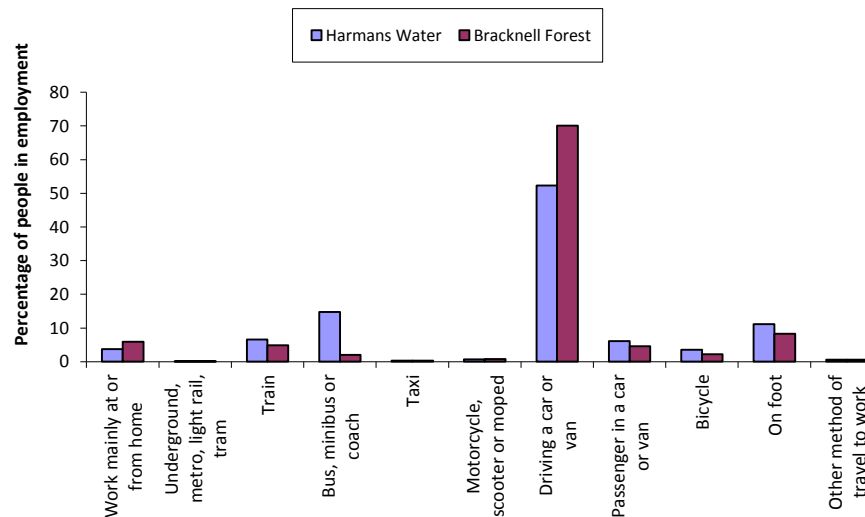

Accessibility

- Harmans Water is a 32 minutes walk from the centre of Bracknell. Local bus services are provided by First in Berkshire & The Thames Valley and Courtney Buses.
- Bracknell has two main railway stations, Bracknell and Martins Heron, both of which are on the Waterloo to Reading Line operated by South West Trains. As a consequence of the frequent service on this line, Bracknell is now a major commuter centre with its residents travelling in both directions (westwards to Reading and eastwards to London Waterloo).

Access to Services

- There are 637 households in Harmans Water who do not own a car or van. This is 18.6% of all households in the Ward which is more than the Bracknell Forest average.
- The indices of multiple deprivation includes a measure of barriers to housing and services. On this measure Harmans Water is the 4th most deprived ward in Bracknell Forest (out of 18 Wards).
- There are no people in the ward who are living in areas classed amongst the 5% most deprived in Berkshire, on this measure according to the latest Indices of Deprivation.
- There are no people in the ward who are living in areas classed amongst the 5% most deprived in Bracknell Forest on this measure according to the latest Indices of Deprivation.

Method of travel to work

4. ECONOMY AND ENTERPRISE

In Harmans Water 10.1% of the working age population claim benefits compared with 7.4% in Bracknell Forest. Broken down:

Statistical Group	Harmans Water		Bracknell Forest	
Job Seekers	120	2.1%	1,170	1.5%
ESA and Incapacity Benefits	235	4.2%	2,475	3.2%
Lone parents	90	1.6%	675	0.9%
Carers	55	1.0%	605	0.8%
Other income benefits	15	0.3%	130	0.2%
Disabled	50	0.9%	665	0.8%
Bereaved	5	0.1%	125	0.2%
Total Claimants	570	10.1%	5,845	7.4%

Qualifications

Recent statistics on qualifications are available at ward level using data collected as part of the 2011 Census. This showed that:

- 16.5% of working age people in Harmans Water have no formal qualifications.
- 41.1% were qualified to NVQ Level 3 or higher compared with 43% in Bracknell Forest as a whole.
- Please see the 'Education' section of these Ward Profiles for information on school attainment.

Employment

- In Harmans Water, the majority of people in employment (44% of workers) were employed in Managerial/professional/technical occupations. 18% of workers were employed in Professional occupations.
- In Bracknell Forest as a whole the majority of people in employment (47% of workers) were employed in Managerial/professional/technical occupations. 19% of workers were employed in Professional occupations.
- 71.75% of the population of Harmans Water who are aged 16 to 74 years are in employment. This is lower than the average in Bracknell Forest.
- 4.2% of the population of Harmans Water who are aged 16 to 74 years are unemployed. This is higher than the average in Bracknell Forest.

Hours worked

5. EDUCATION

We have to treat the following data with some caution due to the small numbers that are involved in the calculations. It is likely that differences between areas will be largely due to random effects occurring within the data. Data is only available at a Ward level for children who both live in, and attend school within, the local authority.

Pupil characteristics

- 16.2% of children living in Bracknell Forest come from non-White British backgrounds. 23.3% of children living in Harmans Water come from non-White British backgrounds.
- 8.7% of children living in Bracknell Forest have English as a second language. 13.2% of children living in Harmans Water have English as a second language.

Unauthorised absences

- 0.8% of school sessions were missed through unauthorised absences by children living in Bracknell Forest. School absence data is not available for Harmans Water.

Key Stage 2 attainment

- 65.4% of children living in Bracknell Forest achieved the expected level of attainment in Key Stage 2. 67.2% of children living in Harmans Water achieved the expected level of attainment in Key Stage 2.

GCSE attainment

- 60.2% of children living in Bracknell Forest achieved 5 GCSEs at grades A* to C which included English and Maths. 57.4% of children living in Harmans Water achieved 5 GCSEs at grades A* to C which included English and Maths.

Schools

- There are two schools located in Harmans Water; Harmans Water Primary School and Ranelagh Secondary School.

6. HEALTH

It is often difficult to use health data when looking at small areas such as Wards. This is because of the size of the numbers involved. For example, only a few people from each Ward may be admitted to hospital each year for a specific condition. When we are looking at numbers that are very small we have to consider two key points before they are used in profiles such as this. Firstly, when numbers are small we are not legally able to share them as the individual may be identifiable from the data. Secondly, it is difficult to come to any reliable conclusions from information which is based on these small numbers. It may also be the case that the information is not available at these low levels. This is particularly true of information about peoples lifestyles (for example, how many people smoke or drink alcohol). One of the ways that this is overcome is to use 'modelled' data. This is data that has been taken from a much larger number of people and used to estimate the likelihood of a certain characteristic appearing in other areas such as Wards depending on some key features of that area such as how many people of a particular age group live there.

- The percentage of live births to mothers living in Harmans Water which were of a low birth weight is estimated to be 8.3%. The percentage on average across Bracknell Forest is 6.3%. Any difference is not statistically significant.
- The number of people living in Harmans Water who are diagnosed with cancer is as expected given the age and gender structure of the population.
- The average life expectancy at birth for males living in Harmans Water is 79.6 years. The average life expectancy at birth for females in Harmans Water is 84.3 years.

Deaths

Deaths from all causes, all ages	As expected*
Deaths from all causes, under 65	As expected
Deaths from all causes, under 75	As expected
Deaths from all cancer, all ages	As expected
Deaths from all cancer, under 75	As expected
Deaths from circulatory disease, all ages	As expected
Deaths from respiratory diseases, all ages	As expected

* Given the age and gender structure of the population and national death rate

Hospital admissions

Emergency hospital admissions for all causes	Lower than expected*
Planned hospital admissions for all causes	Lower than expected
Emergency hospital admissions for all coronary heart disease	As expected
Emergency hospital admissions for stroke	As expected
Emergency hospital admissions for heart attack	As expected
Emergency hospital admissions for chronic obstructive pulmonary disease	As expected

* Given the age and gender structure of the population and national admission rates

6. HEALTH

Lifestyles

- The heights and weights of children in reception year and year 6 are measured annually as part of the National Child Measurement Programme. 5.93% of reception year children in Harmans Water are obese. An average of 7.5% of reception year children in Bracknell Forest are obese.
- 16.8% of year six children in Harmans Water are obese. An average of 14.9% of year six children in Bracknell Forest are obese. It is important to note that this data at Ward level involves small numbers and any differences between areas will be, in part, due to chance occurrences in the data.
- An estimated 24.1% of adults in Harmans Water are obese.
- An estimated 18.6% of adults in Harmans Water binge drink.
- An estimated 26.5% of adults in Harmans Water eat healthily.

Sense of health and wellbeing

- According to the 2011 Census 86.3% of adults in Harmans Water feel that they are in either good or very good health.
- 5.2% of adults in Harmans Water feel that their lives are limited a lot due to ill health or disability and 7.6% of adults in Harmans Water feel that their lives are limited a little due to ill health or disability.

People providing at least one hour of unpaid care per week

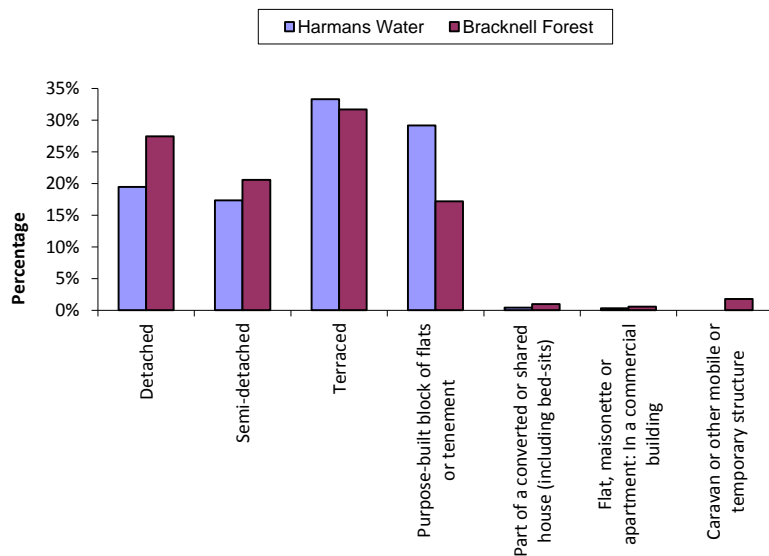

7. HOUSING

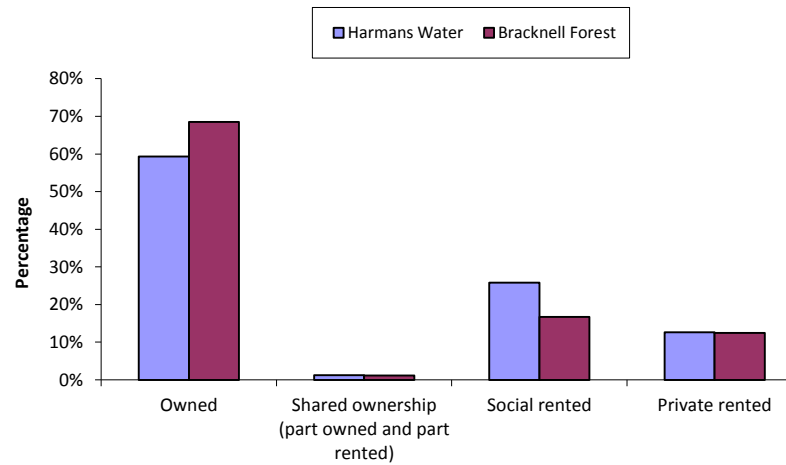

- The most common council tax band in which housing in Bracknell Forest falls is Band C. This accounts for 37.5% of all dwellings. The most common council tax band in which housing in Harmans Water falls is Band C. This accounts for 41.3% of all dwellings.
- There are a total of 3484 dwellings in Harmans Water. 0.03% of these are shared dwellings. This is fewer than the average number of shared dwellings across Bracknell Forest.
- The most common housing type in Harmans Water is Terraced. This accounts for 33.3% of all housing.

- The average household size in Harmans Water is 2.3 people. Which is smaller than the average for Bracknell Forest.
- The average number of rooms in houses in Harmans Water is 5.4. Which is fewer than the average for Bracknell Forest.
- The average number of bedrooms in houses in Harmans Water is 2.7. Which is fewer than the average for Bracknell Forest.
- 4.04% of housing in Harmans Water is classified as needing one or more bedrooms more than it has in order to be adequately sized for the number of people living there. This is more households than the Bracknell Forest average.
- 1.4% of houses in Harmans Water do not have central heating. Which is more than the average for Bracknell Forest.

Housing types

Housing tenure

8. COMMUNITY SAFETY

- There were 307 crimes recorded in Harmans Water during 2013/14. This equates to 36 crimes per 1,000 people living in Harmans Water - a rate that is lower than the average across Bracknell Forest.
- The most commonly occurring crime was classified as ASB for which there were 15.7 crimes per 1,000 people living in Harmans Water.

9. ENVIRONMENT

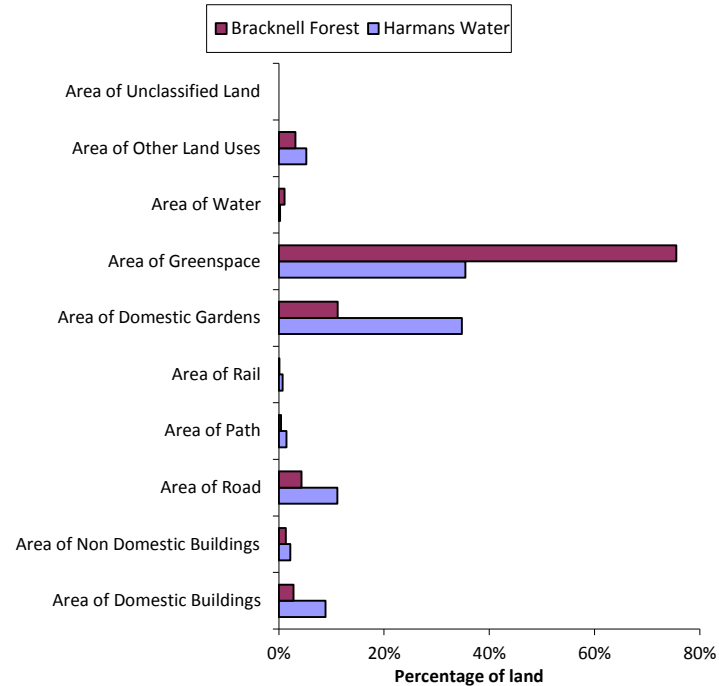

- In Harmans Water 100% of the population live in areas classified as urban city and town.
- Harmans Water has an area of 201 hectares which represents 1.84% of the total area of Bracknell Forest Unitary.
- Population density describes the average number of people living in each hectare of land in an area. There are an average of 39.6 people living in each hectare of Harmans Water. This is more than are living on average in each hectare of Bracknell Forest.

The most common land use in Harmans Water is areas of Greenspace, this is followed by areas of Domestic Gardens and areas of Road.

Total domestic energy consumption

Land use

Item	Source	Date	Description
1. Summary Indicators			
Indices of Multiple Deprivation - IMD (2012)	Department for Communities and Local Government (DCLG)	2010	A national index of deprivation, where 32,480 Lower Super Output Areas are ranked in order of relative deprivation
% children in Poverty (2012)	Department for Work and Pensions (DWP)	2014	Measures the % of children in households receiving Child Tax Credits and with incomes 60% or less of the median
Access to Services - IMD domain (2010)	DCLG	2010	A national index of deprivation, where 32,480 Lower Super Output Areas are ranked in order of relative deprivation
% JSA Claimants (November 2014)	NOMIS	2014	DWP benefits data published by NOMIS
Post-16 Qualifications - % Level 3 or higher (2011)	2011 Census	2011	% of working age population with level 3 or higher
% key Stage 2 Level 4+ (2012)	DFE/Berkshire Local Authorities	2011/12	% of pupils achieving Level 4 or higher in both English and Maths
% 5+ GCSEs A*-C (inc Maths and English) (2012)	DFE/Berkshire Local Authorities	2011/12	% of pupils achieving 5 or more GCSEs at grade A*-C including English and Maths
All Cause Mortality <75 (2008-10)	Public Health England	2006-2010	Age/sex standardised mortality rates
Life Expectancy - males (2008-10)	Public Health England	2006-2010	Life expectancy at birth calculated from all cause, all age mortality
Life Expectancy - females (2008-10)	Public Health England	2006-2010	Life expectancy at birth calculated from all cause, all age mortality
Emergency hospital admissions for all causes (2010/11)	Public Health England	2006-2010	Age/sex standardised hospital admission rates
% low Birthweights <2500g (2008-10)	Public Health England	2007-2011	Percentage of live births with weight <2,500g
% occupancy rating - bedrooms -1 or less (2011)	Public Health England	2011	A measure of under-occupancy and over-crowding. A value of -1 implies that there is one room too few and that there is overcrowding in the household.
% no Central Heating (2011)	2011 Census	2011	The percentage of housing which does not have central heating
% socially Rented (2011)	2011 Census	2011	The percentage of households that socially rent
Crime rate per 1,000 (2013/14)	2011 Census	2014	Total crime rate per 1,000 population
Anti-social Behaviour rate per 1,000 (2013/14)	Thames Valley Police	2014	Total ASB rate per 1,000 population
Theft and handling stolen goods rate per 1,000 (2013/14)	Thames Valley Police	2014	Total Theft and Handling of Stolen Goods rate per 1,000 population
Violence with/without injury (2013/14)	Thames Valley Police	2014	Total violence with/without injury rate per 1,000 population
2. Demographics			
Population size	Office for National Statistics (ONS)	2013	Usual resident population on Census day 2011
Ethnicity	ONS	2011	Ethnic group of usual resident population on Census day 2011. BME is defined by ONS as including White Irish, White other (including White asylum seekers and refugees and Gypsies and Travellers), mixed (White & Black Caribbean, White & Black African, White & Asian, any other mixed background), Asian or Asian British (Indian, Pakistani, Bangladeshi, any other Asian background), Black or Black British (Caribbean, African or any other Black background), Chinese, and any other ethnic group.
Religion	ONS	2011	Religion or belief of usual resident population on Census day 2011

Item	Source	Date	Description
Household composition	ONS	2011	Members of each household on Census day 2011
Migration	ONS	2011	Usual residents who were not born in the UK recorded on Census day 2011
3. Deprivation			
Indices of Multiple Deprivation	DCLG	2010	A national index of deprivation, where 32,480 Lower Super Output Areas are ranked in order of relative deprivation. The Indices of Deprivation 2010 is not a measure of affluence; all of the indicators used in the index are designed to identify aspects of deprivation, not affluence. Therefore the area ranked as the least deprived is not necessarily the most affluent. Follow link for more information: https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/6320/1870718.pdf
Child Poverty	DWP	2010	Measures the % of children in households receiving Child Tax Credits and with incomes 60% or less of the median
Pupils eligible for free school meals	Department for Education (DFE) and Berkshire Local Authorities	2011/12	% of pupils eligible for free school meals
Car Ownership/Public Transport	ONS	2011	Car ownership per household as recorded on Census day 2011
Method of travel to work	ONS	2011	Method of travel to work (those in employment) as recorded on Census day 2011
4. Economy and enterprise			
Benefits claimants	DWP/NOMIS	2013	DWP benefits data published by NOMIS
Employment status	ONS	November 2011	Employment status as recorded on Census day 2011
Qualifications	ONS	2011	Highest level of qualification as recorded on Census day 2012
5. Education			
All education indicators	DFE/Berkshire Local Authorities	2012	The educational data provides 2012 year-end information on pupil residency-based small area pupil attainment. Pupils who reside and attend schools within the Local Authority
6. Health			
Low birth weight babies	Public Health England	2008-2012	Percentage of live births with weight <2,500g
Cancer diagnoses	Public Health England	2005-2009	Cancer incidence rates - age/sex standardised
