Nationally, Smoking in Pregnancy still continues decline from 12% in 2013/14 to 11.4% in 2014/15 bringing us close to the national ambition of 11% by end of this year. In the South of England, rates have also fallen from 11.6% to 10.9%. In Thames Valley area, the rate of smoking at time of delivery is now 8%, is significantly lower than the England and South of England averages and ranges from 6.3% in Wokingham CCG to 10.2% in Newbury and District CCG areas.

These tables show quarterly data relating to smoking at time of delivery. The most recent, Q4 data was published on the 18th June 2015. Previous analysis of the data is available in the Smoking and Tobacco Control Statistics Q3 2014/15 report.

In Q4, the percentage of women SATOD in Thames Valley remains significantly below regional and national averages. However, the percentage of women smoking remained unchanged at 7.9%. Data quality (where smoking status is unknown) was markedly better in this quarter, and there were only 3 cases (0.1% of all cases) across 2 CCG areas where smoking status was not recorded.

Kate King-Hicks – June 2015
