POPULATION BY AGE

Population aged 65 and over, projected to 2030

	2015	2020	2025	2030
People aged 65-69	5,400	5,400	6,400	7,500
People aged 70-74	3,700	5,000	5,000	5,900
People aged 75-79	3,100	3,400	4,500	4,600
People aged 80-84	2,200	2,500	2,900	3,900
People aged 85-89	1,300	1,500	1,900	2,200
People aged 90 and over	800	1,000	1,300	1,700
Total population 65 and over	16,500	18,800	22,000	25,800

Figures may not sum due to rounding

Notes

Figures are taken from Office for National Statistics (ONS) subnational population projections by persons, males and females, by single year of age. The latest subnational population projections available for England, published 29 May 2014, are full 2012-based and project forward the population from 2012 to 2037.

Long-term subnational population projections are an indication of the future trends in population by age and sex over the next 25 years. They are trend-based projections, which means assumptions for future levels of births, deaths and migration are based on observed levels mainly over the previous five years. They show what the population will be if recent trends continue.

The projections do not take into account any policy changes that have not yet occurred, nor those that have not yet had an impact on observed trends.

PERCENTAGE OF TOTAL POPULATION

Total population, population aged 65 and over and population aged 85 and over as a number and as a percentage of the total population, projected to 2030

	2015	2020	2025	2030
Total population	118,500	124,300	129,400	133,500
Population aged 65+	16,500	18,800	22,000	25,800
Population aged 85+	2,100	2,600	3,200	3,900
Population aged 65+ as a proportion of population	13.92%	15.12%	17.00%	19.33%
Population aged 85+ as a proportion of population	1.77%	2.09%	2.47%	2.92%

Figures may not sum due to rounding

Notes

Figures are taken from Office for National Statistics (ONS) subnational population projections by persons, males and females, by single year of age. The latest subnational population projections available for England, published 29 May 2014, are full 2012-based and project forward the population from 2012 to 2037.

Long-term subnational population projections are an indication of the future trends in population by age and sex over the next 25 years. They are trend-based projections, which means assumptions for future levels of births, deaths and migration are based on observed levels mainly over the previous five years. They show what the population will be if recent trends continue.

The projections do not take into account any policy changes that have not yet occurred, nor those that have not yet had an impact on observed trends.

LIVING IN A CARE HOME

People aged 65 and over living in a care home with or without nursing by local authority / non-local authority, by age, projected to 2030

	2015	2020	2025	2030
People aged 65-74 living in a LA care home	4	4	5	5
People aged 75-84 living in a LA care home	13	15	19	21
People aged 85 and over living in a LA care home	33	41	51	62
People aged 65-74 living in a non LA care home	26	30	33	39
People aged 75-84 living in a non LA care home	98	109	137	158
People aged 85 and over living in a non LA care home	199	246	303	369
Total population aged 65 and over living in a care home with or without nursing	374	446	547	654

Figures may not sum due to rounding

Notes

Figures are taken from Office for National Statistics (ONS) 2011 Census, Communal establishment management and type by sex by age, reference DC4210EWL.

Numbers have been calculated by applying percentages of people living in care homes/nursing homes in 2011 to projected population figures.

PROVISION OF UNPAID CARE

People aged 65 and over providing unpaid care to a partner, family member or other person.

	2015	2020	2025	2030
People aged 65-69 providing 1-19 hours of unpaid care	574	574	681	798
People aged 70-74 providing 1-19 hours of unpaid care	272	367	367	433
People aged 75-79 providing 1-19 hours of unpaid care	191	210	278	284
People aged 80-84 providing 1-19 hours of unpaid care	105	119	139	186
People aged 85 and over providing 1-19 hours of unpaid care	46	56	69	85
People aged 65-69 providing 20-49 hours of unpaid care	90	90	107	125
People aged 70-74 providing 20-49 hours of unpaid care	72	98	98	115
People aged 75-79 providing 20-49 hours of unpaid care	51	56	74	76
People aged 80-84 providing 20-49 hours of unpaid care	27	31	35	48
People aged 85 and over providing 20-49 hours of unpaid care	29	36	44	54
People aged 65-69 providing 50+ hours of unpaid care	193	193	229	268
People aged 70-74 providing 50+ hours of unpaid care	177	239	239	282
People aged 75-79 providing 50+ hours of unpaid care	136	149	197	202
People aged 80-84 providing 50+ hours of unpaid care	130	147	171	230
People aged 85 and over providing 50+ hours of unpaid care	104	128	158	193
Total population aged 65 and over providing unpaid care	2,196	2,494	2,886	3,378

Figures may not sum due to rounding

SELF-CARE

People aged 65 and over unable to manage at least one self-care activity on their own, by age and gender, projected to 2030. Activities include: bathe, shower or wash all over, dress and undress, wash their face and hands, feed, cut their toenails, take medicines

	2015	2020	2025	2030
Males aged 65-69 unable to manage at least one self-care activity on their own	468	468	558	648
Males aged 70-74 unable to manage at least one self-care activity on their own	323	456	456	532
Males aged 75-79 unable to manage at least one self-care activity on their own	406	464	609	638
Males aged 80-84 unable to manage at least one self-care activity on their own	330	363	429	594
Males aged 85 and over unable to manage at least one self-care activity on their own	408	510	663	816
Females aged 65-69 unable to manage at least one self-care activity on their own	588	588	672	798
Females aged 70-74 unable to manage at least one self-care activity on their own	600	780	780	900
Females aged 75-79 unable to manage at least one self-care activity on their own	624	702	936	936
Females aged 80-84 unable to manage at least one self-care activity on their own	636	742	848	1,113
Females aged 85 and over unable to manage at least one self-care activity on their own	1,036	1,184	1,406	1,628
Total population aged 65 and over unable to manage at least one self-care activity on their own	5,419	6,257	7,357	8,603

Figures may not sum due to rounding

DEMENTIA

People aged 65 and over predicted to have dementia, by age and gender, projected to 2030

	2015	2020	2025	2030
People aged 65-69 predicted to have dementia	67	67	79	92
People aged 70-74 predicted to have dementia	101	137	137	159
People aged 75-79 predicted to have dementia	175	199	263	268
People aged 80-84 predicted to have dementia	262	298	345	463
People aged 85-89 predicted to have dementia	261	317	356	433
People aged 90 and over predicted to have dementia	240	299	385	502
Total population aged 65 and over predicted to have dementia	1,106	1,316	1,565	1,918

Figures may not sum due to rounding

Notes

The most recent relevant source of UK data is Dementia UK: A report into the prevalence and cost of dementia prepared by the Personal Social Services Research Unit (PSSRU) at the London School of Economics and the Institute of Psychiatry at King's College London, for the Alzheimer's Society, 2007.

The prevalence rates have been applied to ONS population projections of the 65 and over population to give estimated numbers of people predicted to have dementia to 2030.

To calculate the prevalence rates for the 90+ population, rates from the research for the 90-94 and 95+ age groups have been applied to the England population 2006 to calculate the numbers in each age group, the sum of these groups is then expressed as a percentage of the total 90+ population to establish the predicted prevalence of the 90+ population as a whole.

FALLS

People aged 65 and over predicted have a fall, by age and gender, projected to 2030

	2015	2020	2025	2030
People aged 65-69 predicted to have a fall	1,112	1,112	1,294	1,522
People aged 70-74 predicted to have a fall	880	1,182	1,182	1,370
People aged 75-79 predicted to have a fall	698	790	1,047	1,066
People aged 80-84 predicted to have a fall	718	817	947	1,272
People aged 85 and over predicted to have a fall	946	1,118	1,376	1,634
Total population aged 65 and over predicted to have a fall	4,354	5,019	5,846	6,864

Figures may not sum due to rounding

Notes:

Figures are taken from Health Survey for England (2005), volume 2, table 2.1: Prevalence and number of falls in last 12 months, by age and sex.

The prevalence rates have been applied to ONS population projections of the 65 and over population to give estimated numbers predicted to be have fallen at least one in the last 12 months, to 2030.

MOBILITY

People aged 65 and over unable to manage at least one mobility activity on their own, by age and gender, projected to 2030. Activities include: going out of doors and walking down the road; getting up and down stairs; getting around the house on the level; getting to the toilet; getting in and out of bed

	2015	2020	2025	2030
People aged 65-69 unable to manage at least one activity on their own	460	460	536	630
People aged 70-74 unable to manage at least one activity on their own	490	656	656	760
People aged 75-79 unable to manage at least one activity on their own	504	570	756	768
People aged 80-84 unable to manage at least one activity on their own	528	604	698	933
People aged 85 and over unable to manage at least one activity on their own	980	1,150	1,405	1,660
Total population aged 65 and over unable to manage at least one activity on their own	2,962	3,440	4,051	4,751

Figures may not sum due to rounding

Notes

Rates for those who are unable to manage at least one of the mobility tasks listed are as follows: Figures are taken from Living in Britain Survey (2001), table 29.

The prevalence rates have been applied to ONS population projections of the 65 and over population to give estimated numbers predicted to be unable to manage at least one of the mobility tasks listed, to 2030.
